Course Description

This course is an introduction to basic phenomena and organizational principles of psychology that is featured by maladjusted, self-defeating, emotionally and cognitively disturbed behavior. The course will survey basic models of mental abnormality with the descriptive focus on major mental disorders. The *Diagnostic and Statistical Manual of Mental Disorders* (4th Edition, Text Revised) will be applied.

Course Objectives

At the successful completion of this course student should be able to:

1. Define and evaluate criteria for abnormal behavior;
2. Identify major psychological disorders according to DSM IV-TR;
3. Understand basic models of mental abnormality;
4. Outline core principles of treatments for major psychological disorders.

Course Requirements

Attendance: Classroom attendance is obligatory – **30 points**. To be in class on time is expected. Late students will NOT be admitted into the class. Please finish up your personal businesses before class begins. Student is expected to be on class during entire class time with no early leaving. General medical condition or emergency case will not interfere with your attendance rating.

In-class work: Active participation is strongly expected – **30 points**. Student is required to attend class having textbook's chapter read and processed intellectually. Extra readings are highly encouraged. Students are expected to develop their critical skills. **Discussions** of case studies and essential clashing views readings provided by core text and additional bibliography constitute significant part of classes. There will be ten (10) discussions of clinical cases each worth 5 points. **50 points** total.

Quizzes: Five quizzes will be given during the semester. Quizzes will encompass the information surveyed the core text chapters, discussions, case examples, video and other illustrative material. The format of quizzes is short essay questions, multiple choice and/or true-false. Each quiz will be running over first 30 minutes of class. Quiz is worth **10 points** each. **50 points** at total.

Argumentative Essay: Each student is required to write **two** short essays. The topic of first essay is "The problem of normalcy and abnormality in clinical science". The question to be considered is "Are there precise boundaries of abnormal behavior?" Elaborate your ideas basing on primary sources first. The text of essay should consist of 7 typed pages, bibliography list inclusive. Essay #1 due date and time is **October 25; 11:00 pm**. The late papers will NOT be accepted except cases of genuine or legitimate excuse. The topic of the second essay is up to your choice. However it is required to be in compliance with thematic content of the course. The text should consist of 10 typed pages, bibliography list inclusive. You are encouraged to take my individual consultation to work on this assignment. **Paper revisions are strongly recommended**. Deadline to submission the second paper is **December 10; 11:00 pm**. The late essays will NOT be accepted except cases of a genuine or legitimate excuse. Essays as well as any written assignments must follow APA (American Psychological Association) style**. Please follow APA Student Writer's Manual (1999) for detail. Essays should be submitted electronically. Appraisal for the essay is **25 points** each.
